

Fantastic landscape and solemn atmosphere!

Instagrammable tour in

Yugawa-machi, Sakiyama Peninsula!!

What is the real purpose of the tunnel...?!

A tunnel called "Teppoguri" excavated for rice cultivation which has been supporting the livelihood of local residents.

This is the tunnel constructed as irrigation waterway to supply water to paddy fields, taking water from the Sakiyama River flowing nearby. People in Sakiyama district call this tunnel "Teppoguri", which is an important irrigation facility still supporting local residents in rice cultivation.

A tunnel of another dimension!?

Current address: within Unoura fishing port in Nanao-City
